

NOTE:- ABOUT THE ANALYSIS OF THE TEXT-BOOKS.

The selection of cognates, based on the text material, gives only 27 common shared items. The reason for the lesser number of cognates, may be assumed, that the topics of the lessons are different.

(In Telugu the text is very simple one and story to the children other languages the text material is from IX Standard).

The Malayalam lesson deals with 'kaalidaasan'. The Tamil related to the duty of Mother or Women. Telugu the topic is something connected with "red Indians". In Kannada the lesson deals with 'cooking'. And also the selection of lesson is not in any order. Kannada it is the 9th lesson, Malayalam 9th is selected, Telugu 2nd lesson is selected.

The possibility of common words in these lessons will be less, Most of the words in each lesson will be related to the particular topic selected. Hence the shared items will be very much less.
